

How to use the multilingual Teeviit youth info website?

www.teeviit.ee/youth-info/en/

1 Surf and explore the themes

You can find 10 themes, over 100 articles, and 4 language options (EE, RU, EN, UA) on the website. All information is identical in four languages.

2 Search for a necessary topic

Do you need info on mental health or other topics to support youth, but you do not speak the same language? No worries! Search the necessary info in a suitable language.

3 Found it? Just change the language

If you found the needed info, change the language in the menu at the top. The info is then in the selected language. Isn't it easy? Share the link with youth or print it out.
